### Chapter 11. Dehydration/Rehydration | Improvised Medicine ...

Improvised medicine might be viewed as a skill reserved for the wilderness — for the people who can whittle an entire trauma bay out of a few sticks. Indeed, someone is occasionally pressed to use a hydration bladder tube to perform a cricothyroidotomy on the side of a mountain. However, emergency medicine is a specialty of improvisation, and the same techniques and ingenuity used in the wilderness setting have a direct benefit in the emergency department (ED).

### Improvised Medicine: Lessons from the Wilderness EMRA

At the heart of wilderness medicine is improvisation, a creative amalgam of formal medical science and commonsense problem solving. Medical emergencies can arise at any time in wilderness settings; clinicians in these environments often encounter situations requiring their interventions with little or no medical equipment at hand.
